10.00-11.30 AM CET

WATER REUSE REGULATION: **IMPACT ON THE WATER SECTOR**

The Regulation on minimum requirements for water reuse for agricultural irrigation entered into force in June 2020.

The new rules will apply from 26 June 2023 and are expected to encourage and facilitate water reuse in the EU. This text covers not only the water reuse in agriculture, but allows EU member states to use reclaimed water for further uses such as industrial water reuse and amenity-related and environmental purposes.

On this occasion, the **European Water Association** is organising a Webinar on Water Reuse that will provide the participants with a **“general introduction on Water Reuse and overview of the current legislation in Europe”**.

It will also be platform to exchange on the impact of this regulation on the water actors. The speakers will present **“the view of the academic community”** on that topic and present a **“General approach for the implementation of water reuse”**. All presentations will be followed by a discussion open to the participants.

Program :

Prof. Jiri Wanner

University of Chemistry and
Technology Prague

The EU Water Reuse Regulation:

- General introduction
- European Overview

Prof. Dr.-Ing. Jens Haberkamp

FH Münster – University of Applied Sciences

IMPACT ON WATER ACTORS:

- General approach for implementing water reuse projects

Prof. Dr.-Ing. Jörg E. Drewes

Chair of Urban Water Systems Engineering -
Technical University of Munich

- Point of view of the academic community

Paulo Inocêncio

Águas do Tejo Atlântico

- Águas do Tejo Atlântico plan towards water reuse and circular economy pathway
